

ENVIRONMENTAL POLICY

RENOLD IBERIA, SLU disposes of an environmental management system that establishes a series of policies and principles to be followed:

- Manage our activities in order to reduce as much as possible our environmental impact. By being consistent with our minimization plan and dedicating all our efforts to comply with it and improve it year after year.
- Continuously improve our activities, products and services in order to collaborate to a fair environmental development and to prevent pollution.
- Conserve and protect the environment by operating in a socially responsible way.
- Comply with all existing regulations proceeding from European and National levels, as well as from Regional and Local ones; and remain aware of any evolution of such laws in the future.
- Design our facilities and processes to operate and be maintained in the most efficient way and in the respect of the environment.
- Carry out a strict and meticulous control of the management and of the declaration both of our packaging and our hazardous waste.
- Work to maximise the productive efficiency and try to minimise our energy consumption and the generation of hazardous waste from our processes.

By being aware of the impact of our activities on the environment, we assume among our priorities to encourage and promote this series of guidelines and principles.

We perform periodic environmental external audits in order to follow up on the actions we undertake and focus in our continuous improvement process in the interest of the environment that surrounds us.

In Ribarroja del Turia, Valencia on 8 April 2024

Mr. Rodrigo Andrés
General Manager of **RENOLD IBERIA, SLU**
